

Panintertrade presents a new range of Scanning Systems

The Cheq-IT™ XPress Systems are members of the “**New Generation**” Series of Distributed Check Image Systems. These productive and user friendly scanner are designed to meet our customer’s specifications. Cheq-IT™ Xpress Systems are manufactured to superior engineering and electronic standards.

The **378 XPress** integrates *High Speed* 24 bit **COLOR**, 256 byte **GRAYSCALE** and Bitonal Contact Image Sensor (CIS) camera technology into a small footprint fast track scanner.

Designed for use in Remote Check Image Capture applications by Financial Institutions and Corporations, the “**New Generation**” Cheq-IT™ 378 XPress is a quality and reliable ‘**drop-feed**’ system. This system is used extensively in European Teller Applications.

The **374RD XPress** integrates *High Speed* 24 bit, 256 byte **GRAYSCALE** and Bitonal Contact Image Sensor (CIS) camera technology into a small footprint fast track scanner. In addition it has a specially designed track that opens to permit the capture of **Rigid Documents**; e.g. Drivers licenses.

This unit is often used in Retail and Check Cashing Systems or any application where an identification card is required with a check.

Designed for use by Financial Institutions and Corporations, the “**New Generation**” Cheq-IT™ **508 XPress** Scanner is a superior production system.

With an input hopper that can hold up to 250 items and throughput in excess of 110 x 6” checks per minute, this unit is a workhorse.

Applications include Bank Branch “back counter” check capture, or similar higher volume document/check applications.

“Designed to Perform, Built to last”

Panintertrade presents a new range of Scanning Systems

The Cheq-IT Vermezzo System is a small footprint multi-document scanner. It will not only capture front and back images in a single pass, but will also process pages, coupons, rigid documents (driver's licenses; identity cards etc.) and checks that are intermingled in the same batch.

The new technology that has been assembled into the **Cheq-IT Vermezzo System**, combined with a suite of software tools is a quantum leap in performance and flexibility.

With its in-built ability to capture images of Pages, Checks (reading MICR) and rigid documents, this system has revolutionized transaction image capture.

This system can be used in a wide variety of applications.

For the Technically Inclined

- Cheq-IT Systems operate in a Windows 98, 2000, XP and Vista environment. They also function in a Linux environment. A TWAIN interface is also available.
- The Software Development Kit (SDK) includes programming tools in VB, C++, Delphi and .NET. A System Tester Application is also available.
- Under program control, images can be captured in 24Bit RGB Color, 256 Bit Grayscale or Bitonal mode at either 100 or 200 DPI. Imaging tools include Automatic autocrop and thresholding.
- Specialized DLLs for Image Quality Control; Color or Grayscale Image transformation to Bitonal. StencilFont™ Endorsement and MICR double read and compare capability are available.
- The MICR (magnetic capture) Reader can be programmed to recognize CMC 7 or E13B fonts following STD 1004.
- Optional OCR A and OCR B Recognition Standard Barcode Formats are available. Other formats are available upon request.
- Optional hardware features include a programmable inkjet printer for all systems; an Autofeeder for the Cheq-IT Vermezzo System and a small 'exception item' pocket on the Cheq-IT 508 Xpress System.
- All systems are FCC Class 'B' rated (similar to PCs) which is the highest rating achievable.
- System power is acquired from an external power supply rated at 230 V, 50 Hz, 50W; 115 V, 60 Hz, 50W
- The Cheq-IT Systems are designed to operate in in environmental range of:
Temperature: 15-32°C; Humidity: 35%-85%
